

DIGITAL ADVERTISING PERFORMANCE & CLIENT INSIGHTS

Self-directed portfolio project | Synthetic data | Samir Sadman

Python/pandas • Excel • Tableau-ready

TOTAL SPEND

\$247K

ATTRIBUTED REVENUE

\$849K

BLENDED ROAS

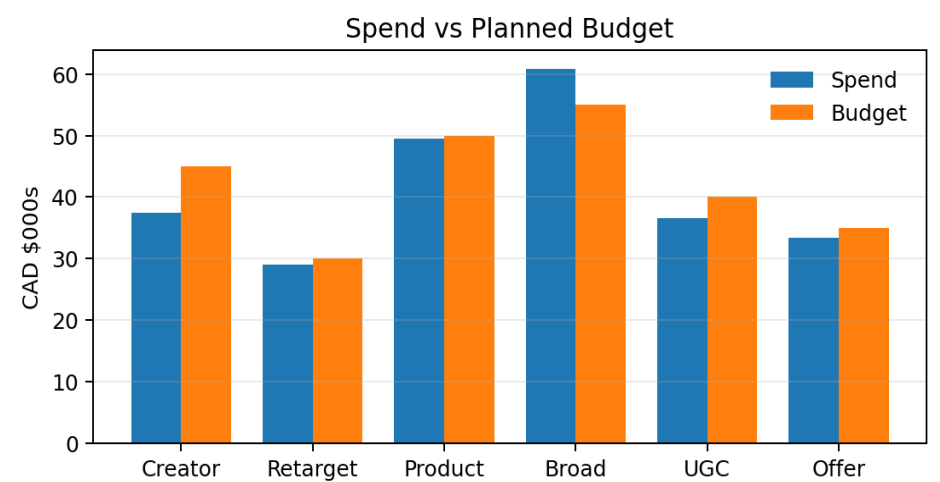

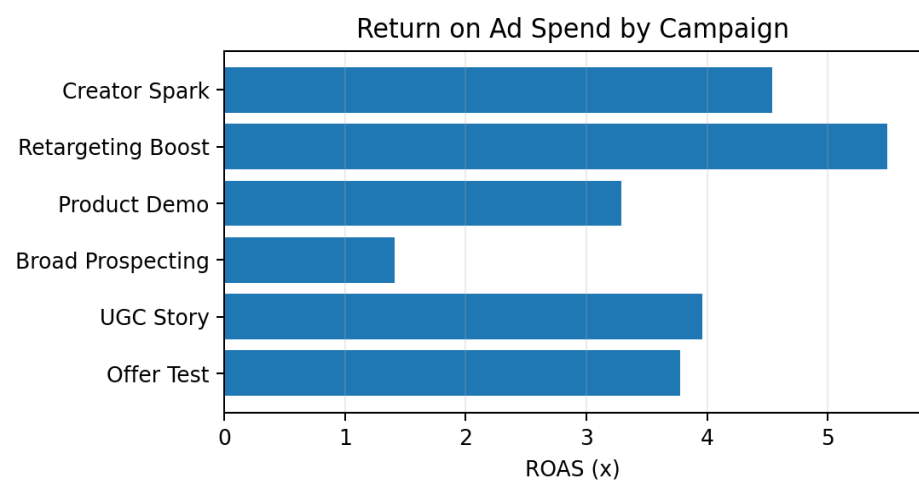

3.44x

BLENDED CTR

1.56%

BUDGET PACING

96.8%

KEY CLIENT INSIGHTS

- 1 Retargeting Boost leads efficiency at 5.49x ROAS and \$14.58 CPA.
- 2 Broad Prospecting is the main efficiency drag at 1.41x ROAS and 111% pacing.
- 3 Creator Spark produces 4.54x ROAS while using only 83% of planned budget.

CLIENT RECOMMENDATION

Reallocate a controlled 10-15% of Broad Prospecting spend toward Retargeting Boost and Creator Spark. Refresh Prospecting creative and landing-page alignment, then monitor marginal CPA before restoring spend. Keep Product Demo and UGC Story as stable coverage while scaling only after efficiency remains inside target.

METHODOLOGY & TECHNICAL WORKFLOW

From raw campaign rows to client-ready decisions

01 INGEST + QA

Load 756 daily campaign-market rows; validate required fields, types and non-negative metrics.

02 KPI MODEL

Aggregate campaign and market performance; calculate CTR, CPM, CVR, CPA, ROAS and pacing.

03 VISUALIZE

Create executive views for ROAS, spend vs budget and weekly portfolio efficiency.

04 RECOMMEND

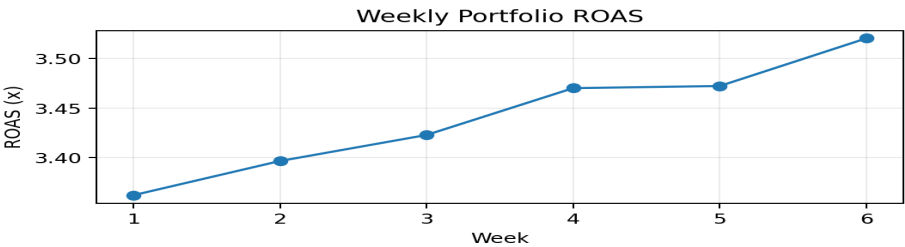

Translate performance gaps into controlled budget shifts, creative tests and monitoring rules.

PYTHON / PANDAS KPI LOGIC

```
campaign = (df.groupby(['Campaign','Objective'], as_index=False)
              .agg({'Spend':'sum','Revenue':'sum',
                    'Impressions':'sum','Clicks':'sum',
                    'Conversions':'sum'}))

campaign['CTR'] = campaign['Clicks'] / campaign['Impressions']
campaign['CPA'] = campaign['Spend'] / campaign['Conversions']
campaign['ROAS'] = campaign['Revenue'] / campaign['Spend']
campaign['Budget Pacing'] = campaign['Spend'] / campaign['Budget']

# Decision rule: scale efficient, under-paced campaigns;
# repair campaigns with high CPA before restoring budget.
```

KPI	Definition	Why it matters
CTR	Clicks / Impressions	Creative + traffic quality
CPA	Spend / Conversions	Acquisition efficiency
ROAS	Revenue / Spend	Revenue efficiency
Pacing	Spend / Planned Budget	Delivery vs plan
CVR	Conversions / Clicks	Post-click efficiency

CAMPAIGN PERFORMANCE SNAPSHOT

Campaign	Spend	ROAS	CPA	Pacing
Retargeting Boost	\$29.0K	5.49x	\$14.58	97%
Creator Spark	\$37.4K	4.54x	\$16.52	83%
UGC Story	\$36.6K	3.96x	\$20.71	92%
Offer Test	\$33.4K	3.78x	\$20.60	95%
